SNOW UPDATE

DATE: April 17, 2009

TIME: 4:30 PM

Snow has been accumulating in the south and west areas. We are currently servicing sites as snow accumulates.

We are planning on extra staffing to deal with the weight of the snow. It will be best to not allow large accumulations to build up. We will try to schedule more frequent removals. In our experience, this is the safest and most economical method.

At about 3:00PM temperatures began to drop and snow intensified. It looks like we will not dodge this storm.

We will schedule crews non-stop through the night.

Thank you,

Wm Michael Farrell, MBA, MSIB, ISA, APLD
