SNOW UPDATE

DATE: April 1, 2009

TIME: 7:00 AM

A weak system is heading our way with 2"-6" possible.

Snow is expected to begin at about noon and continue until 10:00 PM.

Unfortunately, the timing of the storm means messy streets and sidewalks for the evening commute.

We'll be working through the afternoon into the night getting everything clear for the morning.

We are already preparing for a stronger storm expected for Saturday.

Thanks,

Wm Michael Farrell, MBA, MSIB, ISA, APLD
